## PROFILE

Full-stack web developer with 3.2 years of industry experience. Strong organizational and problem-solving skills with proven ability to deliver efficient solutions in fast-paced environments. Looking to leverage Node.js, MERN stack or Python/django expertise and modern AI tools in a role focused on technical innovation and company growth.

## PROFESSIONAL EXPERIENCE

Dec 2024 – present  
Bengaluru

### Fyn Mobility

*Full Stack Web Developer*

- Enhanced the Fyn Admin Dashboard and Fyn Fleets mobile app backend by fixing critical bugs, improving system stability, and delivering new features aligned with evolving requirements; completed multiple JIRA tasks to streamline backend operations.
- Developed a configurable service selection module enabling superadmins to toggle between Surepass and Truthscreen Service Provider for driver document verification. Implemented Truthscreen integrations for onboarding, including Aadhaar OTP, license verification, bank account validation (via account number and IFSC), and DigiLocker services for Aadhaar and license verification.
- Developed automated vehicle email alerts to notify the asset team about key movement patterns, including deployment-ready vehicles in motion, on-ground vehicles with minimal activity, pre-checkin movement, and post-checkout movement.

Sep 2022 – Nov 2024  
Mumbai

### Neebal Technologies

*Software Engineer*

- Developed high-performance REST APIs and optimized database queries, resulting in faster response times and better user experience. Implemented Redis caching to reduce database load in nodejs, SQL database.
- Developed and managed integration-level code for an application in a IBL bank used for managing NEFT/RTGS transactions of ESCROWS & RERA payments, a Finhub product of Datanimbus Client, ensuring seamless data flow across modules..
- Led deployment operations using OpenShift, Kubernetes, and Docker, improving deployment speed and efficiency, optimizing UAT-to-production transitions and significantly reducing deployment time. Provided quick resolution to client issues, maintaining high satisfaction rates.
- Created a full-featured e-commerce platform using MongoDB, Express, React, and Node.js (MERN stack), including user authentication, product management, and payment systems.
- Developed a Trello-like task management application using React and MongoDB, featuring real-time collaboration capabilities, efficient task tracking, and an intuitive user experience.

## COURSES

### Full-Stack Web Development

*Masai School, Bengaluru*

- Completed an intensive Full Stack (MERN) course at Masai School, gaining proficiency in MongoDB, Express.js, React, and Node.js. Developed solo projects like an e-commerce site, weather app, and movie details app.
- Acquired hands-on experience in full-stack development and modern web practices. Collaborated on team projects, including a real-time chat app using Socket io, demonstrating effective teamwork and project management.

## SKILLS

HTML | CSS | JavaScript | NodeJS | Express | React | Sql | MongoDB | PostgreSQL | Socket.io | TypeScript | Kubernetes | Docker | Microservices | Python | Django | Next.js | AWS | Linux Server
